General Information and Requirements

Testing Procedures

Once a vendor has developed a program following the guidelines stated in this manual, they must test the program for approval. Test claims will be issued along with other necessary information for testing. The test claim results should be returned to EDS for review. Upon approval, instructions will be given for the submission of production claims. For more information, please call (334) 215-0111 or 1-800-456-1242.

Help Desk

The EMC Helpdesk is available to providers and vendors to answer questions, concerns, or to address any problems which may occur during transmission. The help desk can be reached at the following:

Issues

The following paragraphs give specific information regarding the implementation of NCDPD Version 5.1. Each of the following paragraphs gives information on specific issues regarding Alabama Medicaid transmissions.

Field Justification

Due to the variable format, field justification is not applicable. However, if you choose to pad each field, all alpha-numeric fields should be left justified and numeric fields should be right justified.

Repeating Fields

Some fields may be repeated or sent more than once. These fields are denoted with ***R***, in the Mandatory/Optional column. The number inside the () represents the number of times the field can be repeated.

Co-Pay Exemption

The patient segment is an optional segment. There are two fields, also optional, that we will capture from this segment, if the segment is sent. Below is a table of these fields and the values we will default to if the segment and/or fields are not sent.

Field	Segment	NCPDP Field #	Valid Values (Valid values appear in bold .)	Default Value	Impact
Patient Location	Patient	307	Ø=Not Specified 1=Home 2=Inter-Care 3=Nursing Home 4=Long Term/Extended Care 5=Rest Home 6=Boarding Home 7=Skilled Care Facility 8=Sub-Acute Care Facility	Ø	It will be assumed that the recipient is not in an LTC facility. Values of 3, 4, and 7 will indicate LTC.

General Information and Requirements

Field	Segment	NCPDP Field #	Valid Values (Valid values appear in bold .)	Default Value	Impact
			9=Acute Care Facility 10=Outpatient 11=Hospice		

A pregnancy indicator field (335-2C) exists in NCPDP 5.1 on the patient segment. A value of '2' in this field will indicate that the client is pregnant. The table below shows the basic data for this field:

Field	Segment	NCPDP Field #	Valid Values	Default Value	Impact
Pregnancy Indicator	Patient	335	Blank=Not Specified 1=Not pregnant 2=Pregnant	Blank	It will be assumed that the recipient is not pregnant.

Other Insurance

NCPDP 5.1 allows the submission of up to 9 instances of other insurance information. Due to the very rare nature of more than one insurance on a pharmacy claim, we will continue to accept only one other insurance amount. In the *Other Payer Amount Paid Qualifier* (field #342) field, a value of "08" (Sum of all reimbursement) should be specified to denote the total amount paid by all other payers.

Compound Drugs

Compound drug billing is enhanced with version 5.1 to allow all NDC's that are part of a compound to be billed on the same transaction.

- Alabama Medicaid will allow up to 25 NDC's/ingredients to be sent per claim.
- Alabama Medicaid will reject compound claims if one or more NDC's is "non-covered".
- For compound claims with one or more non-covered ingredients, a value of "8" should be submitted in field 420-DK (Submission Clarification Code) to allow for payment on the remaining covered NDC's.

Basis of Reimbursement Determination

Field #522, *Basis of Reimbursement Determination* is an optional field that can be returned on a paid or duplicate billing transaction. This field explains how the drug ingredient cost was derived; whether DOJ, FUL, AWP, SMAC, or WAC. The table below shows how the basis of reimbursement values will be set in relation to the rate used in calculating the paid amount for the claim.

Value*	Price Type Used	Description
0	DOJ	Not specified
1	NA – this value will be returned when the billed amount is less than the calculated allowed amount	Ingredient Cost Paid as Submitted
2		Ingredient Cost Reduced to AWP Pricing
3	AWP	Ingredient Cost Reduced to AWP Less X% Pricing
4		Usual & Customary Paid as Submitted
5		Paid Lower of Ingredient Cost Plus Fees Versus Usual & Customary
6	SMAC or FUL	MAC Pricing Ingredient Cost Paid
7		MAC Pricing Ingredient Cost Reduced to MAC
8		Contract Pricing
9	WAC	Acquisition Pricing

*Valid values for Alabama appear in **Bold**.

Rejection Codes

A billing transaction can potentially be responded to with a rejected response, a duplicate response, or a paid response. The format of these response transactions will follow the variable requirements of the version 5.1 standard. For reject responses, Medicaid will return the corresponding four digit internal error code for the NCPDP reject code in the Response Message Segment, field #504-F4 (Message). The error codes will be preceded by two digits indicating how many error codes are being returned. In addition, text descriptions for these error codes will be placed in the Response Status segment, field #526-FQ (Additional message information). These text descriptions will be separated by a semi-colon.

Reversal Request Format Changes

The reversal transaction, or B2 (value of field #103 *Transaction Code* in NCPDP specs), is the transaction by which a provider will submit a reversal transaction. A maximum of four reversal's on a single transmission can occur in version 5.1, but is not mandated. However, Medicaid will continue to support only one reversal transaction per transmission to maintain the current billing practices supported. This is an enhancement that could be implemented in the future if desired by the State Agency.

Also, Version 5.1 makes the NDC number (field #407) mandatory on a reversal transaction. The provider ID, date of service and RX number are also required to be sent on a reversal to further clarify that we have found the correct ICN to reverse. If the provider ID, date of service, RX number and NDC do not match the paid claim exactly, the claim reversal request will be rejected accordingly.
